

RearView

Can you see who's behind you?

RearView asks drivers to do the following EVERY time they reverse:

- ← Think - Do you really need to reverse?
- ← If yes, then is there someone who can act as a banksman?
- ← If not, are you sure there is nothing behind you? Get out and check!
- ← Turn off your radio and wind down your window
- ← Select reverse and give enough time for other road users to see/hear that you intend to reverse
- ← Reverse very slowly, listening all the time for warning sounds that there is an obstruction behind your vehicle
- ← Only reverse for the minimum possible distance

REMEMBER there may be pedestrians, cyclists or motorcyclists behind you who can't make themselves seen and can't get out of the way quick enough. Always reverse with extreme care and with this in mind

RearView supports the fitting of reversing cameras and/or sensors to all lorries, vans and commercial vehicles that have limited or no rear vision
